Introduction

Company Overview

About Us

AirMD is a building science, environmental and industrial hygiene consulting firm headquartered in Boca Raton, Florida. Founded in 2007, with nationwide coverage, the company has undertaken some of the most challenging projects across the country.

We are a comprehensive partner for clients. The value provided is multi-faceted. We offer a diverse range of services across the United States and have a customizable approach to our client's needs,

Our business approach is different. We have in place processes that are designed for convenience for initiating services, maintaining quality, and producing promised deliverables consistently.

We serve multiple markets throughout the United States with local consultants present. All project assignments, customer service, and technical support are present at our corporate office. This is designed purposefully to ensure quality, consistency and accountability is maintained throughout our company around the country for every project.

Initiating service quickly and easily is the goal to avoid delays. To achieve this, all project assignments are completed through either our electronic assignments department where emails notify our team of personnel to respond quickly to the assignment or telephonically through our customer care center. Either way you can trust the assignment will be addressed quickly.

Introduction

Experience

***Producing
promised
deliverables
consistently***

AirMD personnel have backgrounds in the fields of microbiology, industrial hygiene, bacteriology, mycology, aerobiology, microscopy, environmental science, engineering and toxicology. Consulting experience includes industrial hygiene and environmental assessments in governmental, industrial and healthcare facilities, educational institutions, residential and commercial buildings as well as natural catastrophe sites.

Who We Serve

Insurance, property management, real estate, construction, developers, building owners, government healthcare, hospitality, retail, restaurants, industrial, senior living, marine and homeowners. With AirMD's professional, experienced, multi-disciplined scientists and engineers, we offer the ability to serve a diverse group of industries.

What We Do

Project Involvement

Environmental assessments for all potential indoor environmental hazards including biological, chemical and particulates.

Project management and monitoring of large-scale mold, asbestos, and lead remediation projects.

Property damage investigations related to building envelope failures, building pressurization issues, moisture intrusion and water vapor intrusion.

Fire investigations for the presence of combustion byproducts and corrosive anions.

Green building initiatives conducting sampling for LEED, WELL and Fitwel certifications.

Water event investigations identifying source, category of water, extent of damage and remediation plans.

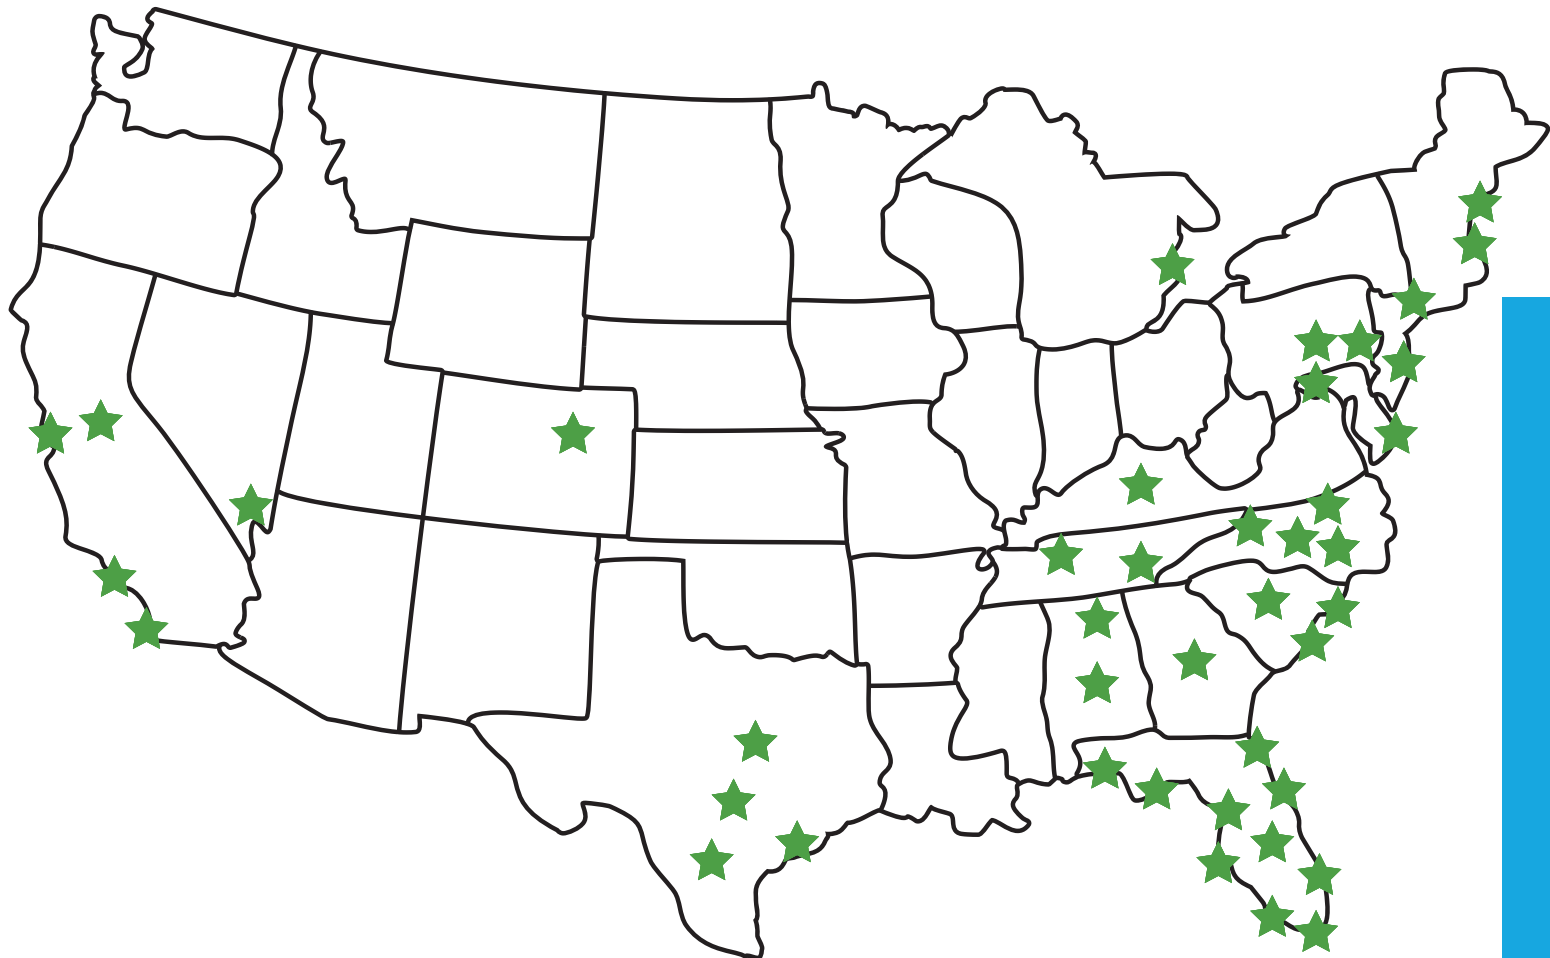

Building condition assessments to identify potential hazardous materials in buildings prior to purchase.

Storm damage and catastrophe response providing teams of consultants to conduct damage evaluation with detailed causation assessments and remediation plans.

Workplace investigations to assess employees' exposure to harmful chemicals and particulates.
